SUMMARY

Human-centered UI/UX Designer & Developer with 7+ years of experience in designing enterprise-scale digital products used by thousands of employees. I specialize in WCAG-compliant design, conversational AI platforms, dashboard UX, and scalable and responsive design systems. Known for simplifying complex workflows, improving accessibility scores, and delivering polished interfaces that reduce user friction.

Key strengths include: UI/UX Design, Wireframing, Prototyping, User Flows, Information Architecture

EXPERIENCE

TCS, PUNE

UX Designer - June 2022 to Present

1. Project: Chatbot / Conversational AI

Project Overview: Led UX design for an enterprise chatbot platform unifying multiple AI bots (GenAI, HR Assist, Privacy Policy, Audit, etc.) to streamline employee support across HR, compliance, finance, and operations.

Key Contributions:

- Created structured, easy-to-understand wireframes and prototypes that improved collaboration with developers and sped up the build process
- Implemented accessibility guidelines and partnered with QA to achieve 100% WCAG 2.1 AA compliance across all chatbot experiences.

2. Project: Employee Management Platform

Project Overview: An Internal employee management platform that helps employees discover courses, stay updated with company news, and connect with mentors. for career development. Built using React and TypeScript, the platform focuses on a seamless and accessible user experience.

Key Contributions:

- Standardized UI components and color tokens, reducing design inconsistencies by 70% across modules.
- Converted CSS files to SCSS to improve code maintainability.
- Conducted accessibility audits and resolved 120+ issues, improving accessibility score from 63% → 100%.
